FLOR DE COBRE

ELEMENT 29

STRATEGIC FOCUS

Element 29 formed from the spinout of 2 key copper project
GlobeTrotters Resource Group.

- Elida Project – grass roots discovery of a new porphyry c
central Peru.
- Flor de Cobre Project – acquisition of an historical secon
resource in the Southern Peru Copper Belt.

STRATEGIC FOCUS

- Develop low-cost, low-risk copper production opportunities in Peru
- Continue to build a copper resource base to more than 4 million tonnes of contained copper.

About Element 29 Resources Inc.

Element 29 Resources Inc. is an emerging copper exploration and development company focused on advancing its portfolio of Peruvian projects towards development in one of the lowest-risk mining jurisdictions in the world. Element 29's growth strategy is led by our strong board and management who have a proven track record of discovery and delivering significant value to our shareholders.

The Company's principal objective is to explore and develop its flagship Flor de Cobre porphyry Cu-Mo project located in southern Peru, just 26 kms southeast from Freeport-McMoRan's Cerro Verde Cu-Mo-Au mine. At the same time, the Company intends to build on its copper inventory with continued exploration on its Flor de Cobre project as well as its remaining 22,000 ha of mining concessions in Peru including the recently discovered Elida porphyry Cu-Mo-Ag system located in central Peru, just 85 km from the coast. Both projects are well located for future mine development and will benefit from nearby infrastructure including roads, powerlines, ports, water, and a skilled workforce.
